

Air Horns Installation Instructions

AHVAL – Honda Valkyrie

Horns: Remove the stock horn by unplugging the wires and removing the 12mm acorn nut. This will leave an 8mm stud exposed. Notice in the hardware kit there are two brackets supplied. Locate the “L” bracket with a tab welded to it. Place the end with an angle cut close to the hole over the stud and secure with the acorn nut see photo(1). Bolt the horn set to this bracket using the 5/16" x 3/4" bolt and lock washer.(NOTE: When installing with “Baker” air wings use the additional bracket, bolt & nut supplied to move the horns forward to clear the air wings).

Hose and wires: Plug the long hose into "Y" fitting on the horn set, plug the gray cord into original horn wires, and wrap the connections with electrical tape. Route both under fuel tank then back to right side cover go behind the ignition switch and between the frame rails. (A piece of stiff wire pushed from the back of the fuel tank to the front will make this much easier, Tape the wires and hose to this wire and pull back through.)

Wiring: See photo (2) Install white wire on compressor (-) terminal. Install red wire onto the compressor (+) terminal. Push hose onto compressor air fitting. Attach compressor to frame tube as shown with hose barb and mounting bolt tab straddling the frame using the two long cable ties provided. NOTE: Be sure air hose is not pinched or kinked.

Attach gray cable wire terminal ends to relay terminals #85 and #86. (see wiring diagram) It doesn't matter which wire goes to which terminal. Attach red wire to one of the remaining relay terminals. Attach the fuse wire to the remaining terminal of the relay. Remove the 1" x 3" black plastic cover from the main fuse holder (see photo 2A). Attach the opposite end of the fuse to the upper-most screw. Re-install the cover. Attach white ground wire to side cover mounting stud as shown in photo #2B.

Cable tie the relay to wiring harness with terminals pointed downward. Cable tie the other wires neatly to wire harness. Turn on the key and try out your handy work. ENJOY.

Thank you for purchasing a RIVCO Product.
