

GL1800 ADJUSTABLE PASSENGER BOARDS
INSTALLATION INSTRUCTIONS
#GL18005A

- Fold up the stock passenger boards and remove the 2 allen bolts securing them to the frame on each side.
- Remove the new boards from their packaging. Notice the left and right stickers on the back side of the base mounting plates. Pull the spring loaded pins outward and rotate the pin to hold them in the “locked out” position. Rotate the board on the base mount and link arm as needed to gain access to the mounting bolt holes.
- Install the boards using the original mounting bolts and tighten securely. Rotate the boards to be level and at the desired height. Rotate the locking pins to align with the lock in slot. Rotate the boards and links slightly until the pins drop into the nearest hole or position.
- After adjusting be sure the locking pins are fully engaged into their slot.
