

**INSTALLATION INSTRUCTIONS
TELESCOPING PARADE FLAG POLE
#PFPOLE**

Not for highway use. This flag pole is designed & intended for
Slow Parade Speed – 25 MPH Maximum

1. Extend the top section of the pole, starting with the smallest tube. Each section will lock into place. Open clips by squeezing two legs together to unhook.
2. Attach top grommet of flag to the top clip, squeeze clip together to lock.
3. Attach bottom clip to bottom grommet of flag, slip clip down pole so that flag is taut and squeeze clip to interlock legs together again.
4. Slide into flag pole socket. You can use a few wraps of electrical tape to reduce the space between the pole and the socket as well as eliminate any rattle. Wrap tape in two places approximately 1" & 8" from the end of the pole.
