

VTX 1800 "C" MODEL SOLO RACK
INSTALLATION INSTRUCTIONS #VTXC010
(Fits with stock seat or seats that use the original stock seat pan)

1. Remove the stock passenger and rider seats. To do this first remove the 10mm wrench size acorn nut located behind the passenger seat and the two (2) 6mm allen wrench size bolts located below the rear sides of the riders seat. Remove the bolts connecting the rider and passenger seats. Install the black plastic receiver bracket onto the riders seat using the two (2) 6 X 20mm flat head screws supplied with the notch or cut out facing towards the rear of the seat and tighten securely. Re-install the rider seat using the original bolts and tighten securely.
2. Remove the front bracket from the passenger seat. Remove the seat strap from the bracket. Install the seat strap onto the new forward passenger seat bracket supplied using the two (2) ¼" X ½" bolts, ¼" washers and nyloc nuts supplied with the nuts facing the bottom of the seat and tighten securely. Place two (2) of the remaining four (4) washers supplied onto each of the passenger seats bracket mounting studs, then the new seat bracket and original nuts and tighten securely.
3. Remove the small rectangular rubber pad from the old passenger seat bracket and attach it to the new bracket in the same location using super glue or contact cement.
4. Place one of the plastic washers supplied over the stud on the rear fender. Install the solo rack by sliding the large tab at its front edge into the slot in the receiver bracket until the slot at the rear lines up with the stud on the fender. Place the other plastic washer supplied on top of the rack and onto the stud. Screw the knob onto the stud and tighten securely.
5. Now you will be able to switch the rack and the passenger seat quickly without any tools by removing the knob and rack, then sliding the tab on the passenger's seat into the receiver bracket and replacing the two washers over the seat bracket then the knob. Be sure to tighten the knob securely, as tight as you can by hand. **Lost knobs are not a warrantable item.**

**CAUTION; DO NOT EXCEED 12 POUNDS
OF WEIGHT ON THE SOLO RACK.**
